## **DETAILED ACTION**

Applicant's amendments filed August 4, 2008 have been entered.

Claims 23-30, 39-40, 43-49 are pending.

The outstanding rejection under 35 USC 103(a) is withdrawn in view of the recitation of at least 40% of polyalkylene glycol being employed in the instant method.

New ground of rejection is set forth below:

## Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 23-30, 39-40, 43-45 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The limitation "the composition does not contain benzyl alcohol" recited in claims 47-49 is not supported by the originally filed specification and claims. There is no indication in the originally filed specification or claims that only benzyl alcohol is excluded from the composition.

Claim Rejections - 35 USC § 103

Art Unit: 1617

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 47-49 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shulman (US Patent 4,599,354) and Edwards (US Patent 4,369,769) as applied to claims 22-29, 38, 39, and 44, and further in view of Potter, for the same reason of record.

Shulman and Edwards suggest a method of treating spinal cord injury with a PEG containing composition for pain. It is noted that the compositions of Shulman and Edwards do not contain benzyl alcohol.

Shulman and Edwards fail to teach the use of 4-aminopyridine in the method of treating spinal cord injury.

Potter et al. teaches the use of 4-aminopyridine to treat spinal cord injury (See #533).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ 4-aminopyridine along with the method suggested by Shulman and Edwards for treating spinal cord injury.

One of ordinary skill in the art would have been motivated to 4-aminopyridine along with the method suggested by Shulman and Edwards for treating spinal cord injury. 4-aminopyridine is known to be useful as treatment for spinal cord injury. The polyethylene glycol containing formulation in Shulman is also known to treat spinal cord

Art Unit: 1617

injury by reducing pain. Employing them concomitantly for treating the very same condition, spinal cord injuries, would be obvious (*In re Kerkhoven* 205 USPQ 1069).

## Response to Arguments

Applicant's arguments filed August 4, 2008 averring the presence of the unexpected benefits have been fully considered but they are not persuasive. The examiner notes that it is applicant's burden to demonstrate unexpected results over the prior art. See MPEP 716.02, also 716.02 (a) - (g). Furthermore, the unexpected results should be demonstrated with evidence that the differences in results are in fact unexpected and unobvious and of both <u>statistical and practical</u> significance. *Ex parte Gelles*, 22 USPQ2d 1318, 1319 (Bd. Pat. App. & Inter. 1992). Moreover, evidence as to any unexpected benefits must be "clear and convincing" *In re Lohr*, 137 USPQ 548 (CCPA 1963), and be of a scope reasonably commensurate with the scope of the subject matter claimed, *In re Linder*, 173 USPQ 356 (CCPA 1972). In the instant case, there is no supra additive effect is seen in the instant case. Therefore, no unexpected effect is considered to be present herein.

Claims 23-30, 39-40, 43-46 are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1617

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
